## Skills

- Java | Angular | JavaScript | TypeScript | Node | Express | React | React Native | Redux
- Cloud Computing | Docker | CI/CD | Unit Testing | Integration Testing | Design Patterns | OOP

## Experience

### Team Leader/Scrum Master

#### Axon Active

Can Tho, Viet Nam

02/2023 - Current

- Coordinated and managed the deployment process across mobile and web platforms, managed both development and production environment, ensuring timely delivery and high-quality products.
- Proactively monitored production logs to identify and resolve potential bugs, ensuring the stability and consistency of the applications.
- Streamlined transaction managers' workflow by automating email marketing processes, resulting in increased deal observations.
- Analyzed user data and behavior using **Google Analytics**, **Google Optimize**, and **Zoho Analytics** to provide valuable insights for customers and facilitate data-driven decision-making.
- Maintained project consistency and functionality across the team by leveraging an in-depth knowledge of the project's business logic.
- Fostered a collaborative work environment by effectively communicating with team members and stakeholders to understand their needs and requirements, resulting in successful feature delivery on time.
- Designed and deployed streamlined processes, including conducting code reviews, pair programming, and organizing knowledge-sharing sessions, to enhance team performance and productivity.

### Software Engineer

#### Axon Active

Can Tho, Viet Nam

07/2021 - 01/2023

- Set up website domain and server infrastructure using Amazon Web Services (AWS), including **CloudFront**, **EC2**, **Route 53**, and **S3**, guaranteeing high availability and website security.
- Developed and maintained **Angular** application, integrating with third-party services such as **Zoho CRM**, **SendGrid**, **Twilio**, and **Google Tag Manager**.
- Developed APIs and automated workflows to integrate with **Zoho CRM**, streamlining business processes and enhancing efficiency.
- Utilized third-party monitoring tools including Lighthouse, Zoho Site24x7, and AWS CloudWatch to identify performance issues, and ensure optimal website speed, stability, and uptime.
- Performed unit and integration testing using JUnit and Cypress for optimal code quality and reliability.
- Configured **React Native** automatic deployment process using **Bitbucket Runner** and **Javascript** bundle, significantly reducing deployment time and increasing development efficiency.
- Developed and maintained the mobile application using **React Native**, enhancing user experience.
- Configured **NGINX server** to securely serve multiple **WordPress** websites with SSL certificates on **AWS EC2**.

### Software Engineer

#### FPT Software

Can Tho, Viet Nam

10/2020 - 06/2021

- Worked closely with cross-functional teams to identify and resolve issues.
- Possess extensive experience working with Scrum and Agile methodologies, including facilitating daily stand-up meetings, sprint planning, and sprint retrospectives.

### Software Engineer, Intern

#### TMA Solutions

Ho Chi Minh, Viet Nam

07/2020 - 09/2020

- **Test Cases Analytics and Statistics:** Web application enables Testers and QA to visualize project test cases based on log files. (Angular/Java/Python/Kafka)

## Education

### Bachelor of Science

#### Can Tho University

Can Tho, Viet Nam

09/2016 - 01/2021

- Major in Information Technology | GPA 3.51

## Projects

- **SKYLAND-WEALTH:** Skyland Wealth is an inclusive platform that facilitates meaningful connections between like-minded individuals, fosters mutual trust, and empowers them to invest together. This goes beyond real estate and other asset transactions; it encompasses opportunities for learning, networking events, and impact investments that can drive positive change in the world.
